

Helpful Hints

The co-ordinates were acquired from a GPS unit, they are in N & W . They represent degrees minutes and decimal fractions of a minute. Page 2 now gives the location of the clues, in all formats. However the final destination remains as degrees, minutes and parts of a minute.

I am sure you will be able to convert to whatever format you prefer,

Find the missing coordinates and rescue Bare Grills .

N1	N2	N3	N4	N5	N6	N7	W1	W2	W3	W4	W5	W6	W7	W8
5	1						0	0	0					

51	24	820	000	18	600
----	----	-----	-----	----	-----

At this coordinate: 1st Minute is W4 & 2nd Minute is N4

51	24	705	000	18	778
----	----	-----	-----	----	-----

Around this Coordinate Butterworth's 6th is N6 and 7th is N7

51	25	069	000	19	246
----	----	-----	-----	----	-----

Near this coordinate It's a struggle but I think this is the right contact: 2nd Digit is N3 & W8, 4th Digit is one less than N5

51	25	195	000	19	632
----	----	-----	-----	----	-----

Assuming you are out, go in past the shield and read some general information. A year:the 2nd digit is W5, Add the 1st and 4th digits to make W6. 3rd Digit is W7,

Oh Deer oh Deer, Bare is feeling a little caged in and hanging on by a thread, you have the coordinates which will get you near, but you might like to take the photo's to match up exactly where he is.
